Employment

2023 - Current

Monarchmart Ltd.
Senior Software Engineer - Next.js, Redux, TailwindCSS
A B2C e-commerce site.
Notable Tasks:
- Implemented facebook and google (**OAuth**) authentication.
- Added axios interceptor to renew the access token using **refresh token for security**.
- Implemented **OTP** sending feature to customers using a third party api.
- Reduced the server cost by **50%** by migrating from AWS to Contabo (**DevOps**).

2020 - 2022

Sharp Interface Ltd.
Software Engineer - React Native, Redux
Developed a mobile application to track product prices.
Notable Tasks:
- Implemented adding products from Amazon-like sites using **XPATH** from the app browser using a messaging system.
- Used **useMemo** and **React.memo** which increased the performance by **20%**.
- Implemented product fetching API by **pagination** which reduced **15%** load time**.**

2018 - 2020

Smartify Ltd.
Software Engineer - *React.js, Redux, Webpack, Gulp*.
Developed a chrome extension which **saves $32.42** per week on average for shoppers.
Notable task:
- Implemented **ShadowDOM** to avoid CSS inheritance from the host site as the chrome app is injected in the host page.
- Created a custom project building system for chrome extension using **webpack and gulp**.
- Worked on creating a scrapper which can **scrape 200+ products** within 4 minutes.

Education

Passing year 2016

B.Sc. in Information & Communication Technology.
Comilla University, Cumilla, Bangladesh.
